

Statement:

Authorship Impersonation of Researcher Francisco Ruiz

Aldo Hernández Barrios, Chancellor of the Fundación Universitaria Konrad Lorenz, wishes to inform that the article "Investigating the Effectiveness of the ACT (Acceptance and Commitment Therapy) Treatment on Mothers of Children with Cancer," published in the Clinical Cancer Investigation Journal, is not authored by Dr. Francisco J. Ruiz or his research team.

Professor Ruiz's name and those of the other co-authors were included without their consent. The mentioned document lacks rigor and was possibly created using artificial intelligence tools simulating scientific writing.

Both Professor Ruiz and the Legal Department of the Fundación Universitaria Konrad Lorenz requested the journal and the publisher to withdraw the article, but to date, they have not received a response.

This conduct harms the good name of Professor Ruiz, his co-authors, and the institution.
